# Email, Calendaring and Collaboration

## Powerful technology...

Axigen's high-performance mail server technology is specifically built to provide you with fast and secure email communication (via Axigen SmartProcessing™ and Axigen GrowSecure™), while ensuring effective space management (via intelligent Axigen UltraStorage™).

## ...adapted to work the way you do

Available on both Windows and Linux OS, the Axigen messaging solution for businesses adds to this powerful technology just the right touch of everything: email, calendaring and collaboration, all backed-up by efficient 24x7 technical support.

## Schedule meetings & organize tasks

Organize your business with effective time-management tools such as personal and public calendars, tasks and notes, available from WebMail, MS Outlook and iCal (Webcal) compatible clients.

## Share & delegate

Share email and calendar folders, contacts, appointments or tasks with co-workers, and allow them to view your availability (Free / Busy status). Delegate calendar / message replies – when out of the office, allow a replacement to confirm meetings, read and send emails on your behalf.

# Local and Remote Access

## MS Outlook & other desktop clients

Communicate using MS Outlook – while taking full advantage of Axigen's calendaring and collaboration (via our Outlook Connector), or by using your favorite POP3 / IMAP client such as Mozilla Thunderbird or Apple Mail.

## Axigen WebMail

The customized, user-centric look and feel of Axigen's WebMail interfaces (Ajax / standard / mobile) seamlessly approach the desktop experience even when you are accessing email remotely.

## Mobile sync with BlackBerry®...

Gain instant access to relevant data such as email messages, contacts or calendars from your BlackBerry® smartphone, via the AstraSync™ or the NotifySync™ client.

## ...and ActiveSync®-enabled phones

Synchronize your email, contacts, calendars or tasks by using Axigen's built-in Exchange ActiveSync® support for mobile devices (Nokia, iPhone, Windows Mobile devices etc).

*Whether you're searching for a replacement for your current resource-draining mail server or simply looking for a more economical way to provide your end users with a best-in-class messaging and collaboration platform, you should certainly consider Axigen.*

# Extensive Security Toolset

## Multi-layer security

The Axigen messaging platform guarantees secure reception, transit and delivery of email. Protect your confidential data with an extensive set of defensive tools, such as: authentication and encryption, anti-impersonation policies, SPF and DomainKeys compliance, blacklisting / whitelisting / greylisting, country filtering, and many more.

## AntiVirus / AntiSpam integration

For extra email protection, you can extend Axigen's standard ClamAV and SpamAssassin defensive tools by integrating any of the available commercial AntiVirus / AntiSpam apps. Further, get premium defense via the Kaspersky AntiVirus / Kaspersky AntiSpam (embedded), Commtouch Real Time AntiSpam, or AVG AntiVirus & AntiSpam (for Linux / FreeBSD) add-ons.

# Effortless Administration

## Web administration console & CLI

Configure service specific parameters through Axigen's comprehensive WebAdmin, designed for optimized navigability, with quick links and contextual help. Alternatively, automate administrative or provisioning tasks by using the Command Line Interface.

## Backup & archiving

Get full / partial restores, offline and online backups, or access from more than one location, via the Back-up and Restore module. Meet regulatory compliance requirements of major international standards through integration with third-party archiving applications.

# Friendly licensing terms

The flexible licensing model allows you to focus on growing your business, via:
- "Pay for what you use" licensing
- Perpetual, OS independent licensing
- Migration options from your legacy mail server
- Easy license upgrades and updates
- Free basic email users for packages under 100 premium users

# 24x7 technical support

Benefit from our primary support level, all year round, with:
- Fast and accurate (human) response time, by email
- Support in different languages provided by local partners
- Assistance for: installation, migration, configuration, troubleshooting etc.
- Multiple additional online resources
- Software maintenance included (new version upgrades, patches or updates)

Additionally, you may choose customized support to have:
- Phone Support
- Free call-back hotline
- Monthly service report
- Implementation: support and training

# Operating systems

RedHat Enterprise, Fedora, CentOS, SuSE, Gentoo, Novell, Ubuntu, Debian, Mandriva, Slackware, FreeBSD, Solaris, Windows Server 2003 / 2008 a.o.

# Ask for Evaluation

All the Axigen product kits can be downloaded as evaluation versions for 30 days, with:
- All features enabled
- Unlimited users
- Unlimited domains
- FIRsT Support included
