- BlackBerry Support** using NotifySync Client **NEW** **add-on**

- AVG Antivirus & AntiSpam Protection** **add-on**

- Commtouch Real Time AntiSpam Protection** **add-on**

CARRIER CLASS TECHNOLOGY

- ▶ **Large scale setups** - Axigen relies on its carrier class technology to sustain complex setups and provide the required level of service availability and seamless scalability
- ▶ **Virtualized hosted solutions for messaging** - through an integrated solution based on Axigen and Parallels-Virtuozzo
- ▶ **AJAX based WebMail** **NEW** - desktop like experience for end users; advertising capabilities for SPs
- ▶ **WebMail Connectivity for mobile phones** with Internet access
- ▶ **Structured administration** with levels of delegation - offers the option of local or remote access to servers, thus configuration is a breeze and maintenance simple and straightforward, while all day-to-day tasks can be easily automated and supervised by customized reports.

SECURED BY AXIGEN GROWSECURE™ ARCHITECTURE

- ▶ Multiple AntiVirus and AntiSpam support; server, domain and user level filters
- ▶ Sender validation (SPF), message integrity validation (DomainKeys compliant)
- ▶ Email flow control with firewall-like rules
- ▶ Encryption & Authentication policies
- ▶ Access Control, Whitelisting / Blacklisting, Open Relay blocking
- ▶ Country filtering; DNS checks; DNSBL.

SEAMLESS EMAIL FLOW WITH AXIGEN SMARTPROCESSING™

- ▶ **Queue management** - inspect the messages in the queue using different filters (e.g. sender, message size, retry count); take various actions on the matching messages (e.g. delete, reschedule, send NDR)
- ▶ **Virtual queues** for distinct remote domains - protect the server from potential overload generated by multiple simultaneous email sending attempts to an unresponsive domain
- ▶ **Processing thread control** - balance the processing power by allocating a specific maximum number of parallel threads to each service, according to your needs
- ▶ **Virtual routing** - control the routing of specific messages through chosen outbound IP addresses based on various message parameters
- ▶ **Built-in DNS cache** - accelerates message delivery by caching DNS responses for use on multiple messages.

A Carrier Class Mail Server for Service Providers

Designed for speed, security and reliability, Axigen is a powerful messaging solution dedicated to Internet and Hosting Service Providers.

axigen
MAIL SERVER

Customized support with Service Level Agreement

Others about AXIGEN

“ If you ask us which of the test candidates was our favourite, we would have to go for the AXIGEN Mail Server. [...] If you are looking for a good mail server with excellent WebMail support, you will be very happy with the AXIGEN Server. ”

Linux Magazine

“ Fast installation and configuration, a very efficient Webadmin and a plethora of settings that can be tweaked are some of AXIGEN's strong points. Add those to stability, almost unbeatable security and great overall performance and you get this high-class mail server solution. ”
