

Premium Mail Server,  
Calendaring & Collaboration  
Total control. Extra Security.

# Business-Class Mail Server, Calendaring & Collaboration Beautiful Features for a fabulous UX!

Webmail with friendly looks and feeling  
(impeccable on any browsers: Chrome, Firefox, Edge, Safari)

Business-Class Messaging  
(pay for what you use, free accounts with every solution)

Optimized hardware usage (save up  
to 50%)

Calendaring & Collaboration (Calendars,  
Tasks, Notes, Outlook Connector)

Synchronization with mobile devices (e.g.  
iPhone, Android, WinPhone8)

Advanced security, effortless  
administration & server operations

# Webmail Fabulous Experience for End User

Compact, Contained Functioning  
Multi-tabs of different types simultaneously available

Multiple Reading Pane Options  
Right, Bottom, or No Reading Pane

Display Density Options  
Compact View for Lower Resolutions

Cool Text Editor  
Including En Dash, Em Dash  
Auto Conversion

Great Search Indexing  
For Faster Searches

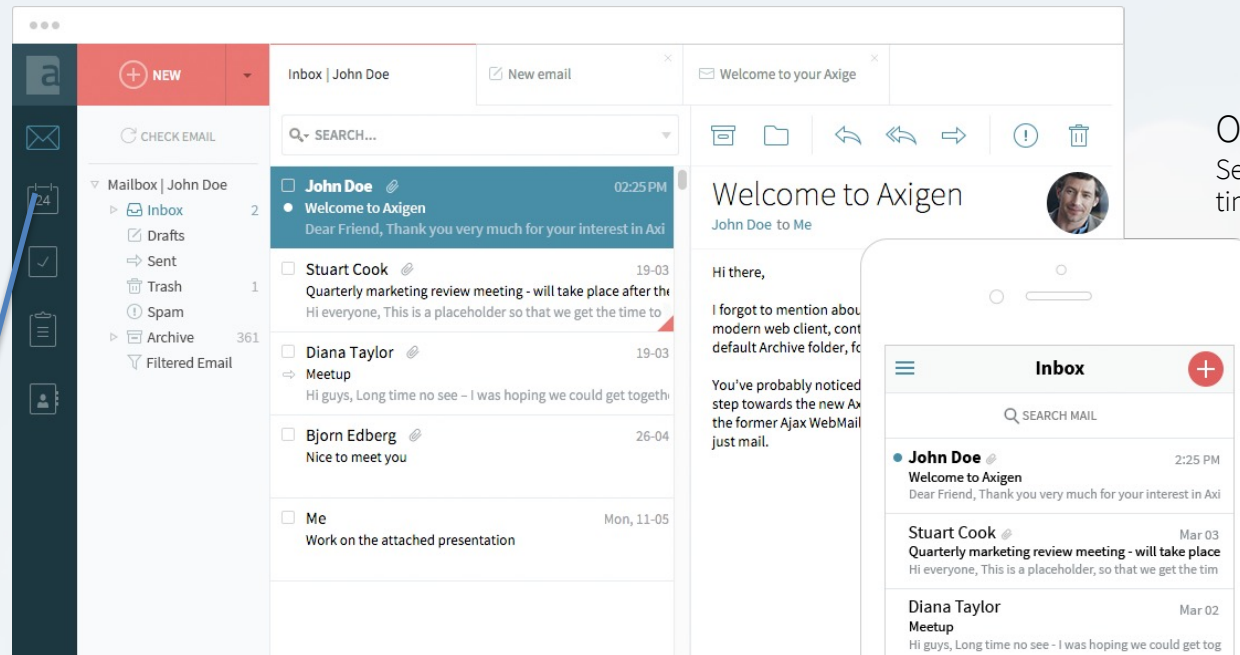

Synced Notes  
With your Mac, iPhone or iPad

Calendar Synchronization  
Computers and Mobile Devices via CalDAV

Filters  
Organize and increase  
efficaciousness

Calendaring  
With availability report

Multiple  
Signatures

Out of Office  
Setting prior the targeted  
time interval

Temporary Aliases  
Keep Spam under Control

Email Deputy Easy Management  
Comprehensive info over managed email addresses

“.eml” Attachements Management  
Direct open in Webmail

Default Mailto Links Manager  
Yes, now its possible through Axigen Webmail

Multiple Visual Themes  
Choose the one that suits you

Keyboard Shortcuts  
33 Shortcuts that Keyboard  
Addicted will love

Temporary Aliases  
Keep Spam under Control

Drag & Drop  
Emails in Email Folder

# WebAdmin Fabulous Experience for Admins

Compact list of Section Tabs  
in the Left Side  
Expandable tree sections

Admin Delegation Options  
Define Admin Groups with permissions on  
specific domains

Listeners  
Add extra flexibility and configurability  
to WebAdmin

WebMail Advertising Options  
Choose the banner type you want to push  
in the WebMail

WebMail Branding  
Configuration per Domain

WebMail Branding Options  
Brand Name, Virtual Host, Logo, Favicon

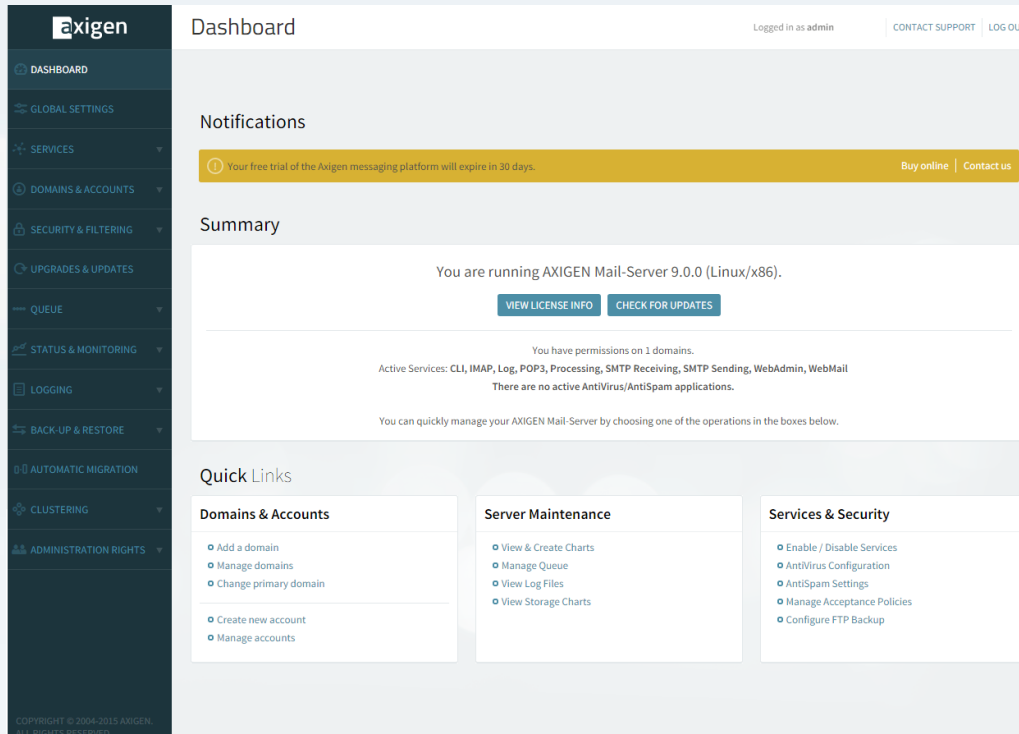

Contextual Help  
Activated by default is  
displayed in the right side

Keyboard Shortcuts  
33 Shortcuts that Keyboard  
Addicted will love

Automatic WebMail Redirect  
(HTTP to HTTPS)

IPv6 Support

Auto-Discovery  
Fast Onboarding for new employees

Groups Management  
Add, Edit, Filter, Delete Options

Reserved Names  
Define a Reserved Names List

Premium Add-ons Management  
Enable/Disable Add-ons for Selected Accounts

Public Folders Management  
Add, Configure, Delete Options

Account Classes Management  
Add, Configure, Delete Options

## Powerful Technology

- Robust architecture & performance
- Multi-tenant infrastructure
- Flexible service offerings for customers, according to your business model

## On your PC, Mac, or Mobile Devices

## Local & Remote Access

- Wide choice of POP3 / IMAP clients
- Ajax "Refreshless" WebMail with desktop-like usability
- Intuitive mobile WebMail Interface
- Brandable & localized standard WebMail interface

## Technical Specifications

### OS COMPATIBILITY

- Windows Server 2016, Windows Server 2019 , Windows 10
- Red Hat Enterprise, CentOS, Debian, Ubuntu, OpenSUSE, SUSE Enterprise , Oracle Linux

### MAIL SERVER

- SMTP(S), POP3(S), IMAP(S),
- WebMail(S) (Desktop and Mobile versions)
- includes List server, Logging, Reporting and FTP Backup modules
- IPv4 and IPv6 support
- provides various, flexible administration options (including a central Web administration interface - WebAdmin)

### MULTI-TENANT INFRASTRUCTURE

- Account classes, delegated administration
- High availability, clustering support
- Expandable storage, reporting & monitoring module
- SNI Support (Multiple SSL hosts on the same IP)

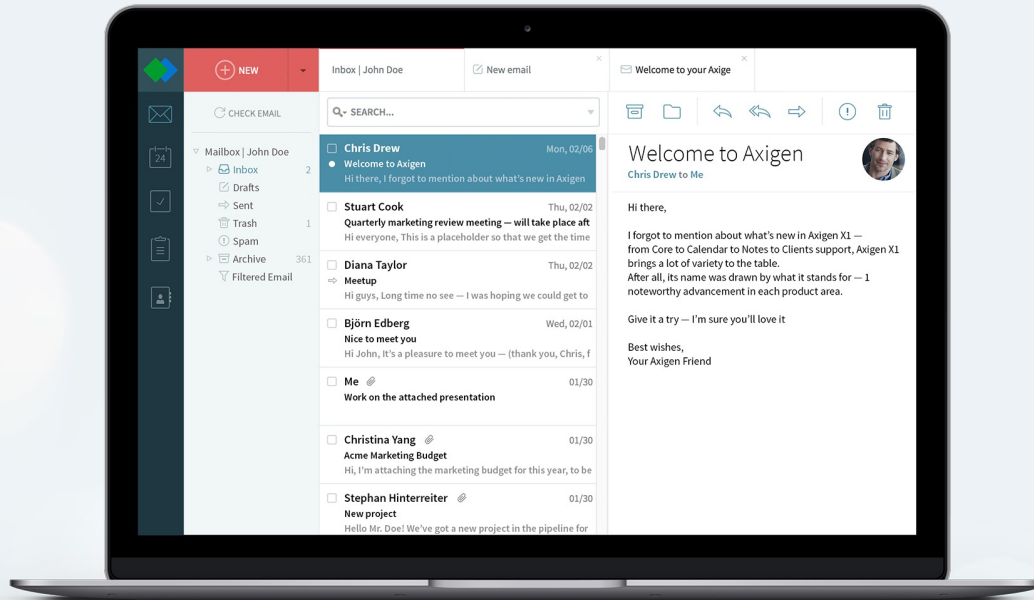

### WEBMAIL ACCOUNT & DOMAIN SETTINGS

- Mailbox quota,
- Attachment size limit,
- Mail size limit, session idle & activity timeout,
- Maximum number of messages sent per hour by one account,
- HTML filtering level for HTML email messages

64  
BIT

## Easy to rebrand

- Localized in over 29 languages (including RTL mode)
- Several skins to be used at the end-user's choice

## Calendaring, Collaboration & Mobility

- Meetings & tasks management add-on
- Wireless mobile sync with Microsoft® Exchange ActiveSync - enabled mobile devices add-on
- Shared information & resources add-on
- Wireless mobile sync with BlackBerry® smartphones add-on

## Technical Specifications

### MULTI PLATFORM ARCHITECTURE

- Axigen Server porting on multiple platforms
- Guaranteed Stability
- Easiest platform switch

### WEBMAIL INTERFACE

- HTML email composer,
- Temporary email addresses (account aliases),
- RPOP connections
- 2-Step Verification (Two Factor Authentication)

### USAGE SCENARIOS SUPPORTED

- Main mail server,
- Backup server,
- Mail relay server

### WEBMAIL ACCOUNT & DOMAIN SETTINGS

- Mailbox quota,
- Attachment size limit,
- Mail size limit, session idle & activity timeout,
- Maximum number of messages sent per hour by one account,
- HTML filtering level for HTML email messages

# Axigen Email Security AntiSpam & AntiVirus Add- ons

powered by

The Bitdefender logo is displayed in a white rectangular box. It features the word "Bitdefender" in a bold, black, sans-serif font.

## Wise add-ons

The mailarchiva logo is displayed in a white rectangular box. It features a stylized icon of three vertical bars of increasing height to the left of the word "mailarchiva" in a black, sans-serif font.

## Technical Specifications

### ADVANCED SECURITY TOOLS

- Antivirus/Antispam
- Antispoofing (SPF authentication rules) Domain Keys and custom SIEVE scripts
- Open source Antispam and Antivirus applications (SpamAssassin and ClamAV) integration,
- Virtually any AS/AV application integration capacity

### MAIL SERVER SECURITY

- Authentication / Encryption
- Multi-layer access control
- Flow control
- Sender validation (SPF compliant)
- Greylisting
- Message integrity validation (DomainKeys compliant)
- Optimized space and mail flow
- Blacklisting / Whitelisting
- Country Filtering
- DNS Blacklists
- DNS Checks
- AntiVirus Filtering
- Identity Confirmation
- AntiSpam
- Message Acceptance / Sending Policies (with expert-mode engine for acceptance rules)
- Routing Policies
- Anti-Impersonation
- Secure passwords enforcement

## Local technical support & assistance

## Delegated Administration

## Friendly licensing terms

- "Pay for what you use" licensing policy
- Perpetual, OS independent licensing
- Migration from your legacy mail server
- Easy license upgrade & update

## Technical Specifications

### EMAIL CLIENTS

- MS Outlook,
- Mozilla Thunderbird,
- eM Client
- Apple Mail

### CLUSTERING SUPPORT

- SMTP, WebMail, POP and IMAP connections routing,
- Integration with an external LDAP-based server (either OpenLDAP or Active Directory),
- WebMail, POP3 and IMAP Proxy services

### INNOVATIVE STORAGE

- Reduced I/O operations and disk access
- Effective space-saving filling procedure
- Advanced control features for system administrators

### Axigen SmartProcessing™

- Reduces email processing time to a minimum

### Axigen UltraStorage™

- Ensures an effective space management
- Prevents service downtime or loss of data even at highest traffic peaks

Product and Services

### Organization Profile

An international shipping company, with more than a century's experience, Vroon delivers reliable, high-quality, and cost-effective services, based on traditional values and a proven track record.

With headquarters located in Breda (the Netherlands), the company employs about 4,000 professionals in offices around the world and on board a diverse fleet of approximately 200 vessels.

Vroon is active — through various subsidiaries and under different brand names — in the following business segments: livestock carriers; offshore-support vessels; offshore installation, maintenance, and engineering services; dry-cargo vessels; container vessels; product / chemical tankers; asphalt / bitumen tankers; car carriers and vessel-management services.

## Case Study

### Challenge

If you treat all transport vessels as "standalone-but-permanently-on-the-move" offices that have to communicate with HQ and with each other by email, you get a complex network of on-site email servers that go online on and off but have to be always operating.

The challenge consisted in finding the best licensing configuration to be technically effective and financially efficient.

There were also some technical details on the subject of caching emails when offline and automatic synchronization when back online

## Axigen delivered to Vroon an Online-Offline Aggregated, Collaborative, and Coordinated Email Server Solution

### Project

Vroon made first contact by downloading the Axigen Trial version to check the Admin console and evaluate user experience. By getting in contact with one of Axigen experts, the project set its requirements and the project design started to develop.

The Axigen team have designed a Customized Silent Installer for Axigen Windows Server along with initial provisioning of vessels' accounts and set the routing rules for communicating with the core email server. That optimized time of installation for each end point with no need of physical assistance at the vessel site.

Vroon employees will use the email service via WebMail, so the Axigen WebMail user experience both for admins and end-users constituted a clear competitive advantage compared with all the other mail server solutions.

## Case Study

# Axigen delivered to Vroon an Online-Offline Aggregated, Collaborative, and Coordinated Email Server Solution

### Solution

An optimized licensing configuration that allows the flexibility required by the distinctive needs of the HQ vs. Vessels and Vessels vs. Vessels dynamic system. A down-scale initial project was chosen in order to constitute the Proof of Concept implementation.

Axigen's WebMail for the end-user is recognized for its outstanding features that give it a fancy email client look and feel: multiple visual themes to personalize your view, the compact, contained operating system with multi-tabs of different types simultaneously available in one browser tab / view, Calendaring function with availability report, Filters that help you organize and increase efficaciousness, and many more.

In addition to the standard messaging functions, the system allows the admin to obtain reports in graphic view along with SNMP related counters through the Reporting and Monitoring Module. A strong Mail Server Security System composed of 12+ security layers embedded in the Axigen Solution makes it a wise choice for the security focused admins / businesses.

Axigen developed a flexible, scalable offer both for Licensing and Support Services Packages. Vroon had the liberty to choose out of a list of combinations of Perpetual vs. Yearly license along with FIRsT and Premium Support for a specific number of servers and different time intervals.

## Case Study

# Axigen delivered to Vroom an Online-Offline Aggregated, Collaborative, and Coordinated Email Server Solution

### Result

Vroom chose to implement initially a pilot project to test a group of users: this gave the technical engineers the chance to assess and validate the emailing mechanisms as the users were being introduced to the benefits of using a new email system.

*“Both parties involved worked having a common objective in mind since Vroom came into the project with clear vision over the solution they were looking for. We’ve had the fortune to be in contact with Wesley Vandamme, ICT Shipboard Infrastructure Manager, a tech-savvy person with great organizational skills who knows very well how to evaluate and choose the best solution to meet the complexity of the requirements.”*

**Bogdan Moldovan,**  
Axigen Head of Sales & Professional Services

*“We found Axigen as being the right product for our system requirements. We had a smooth communication process which we truly appreciate and that helped us in getting to the best solution in a record time frame. Based on the information we had after the pilot implementation, we optimized the package in order to scale up the solution for the entire vessels network.”*

**Wesley Vandamme**  
Vroom ICT Shipboard Infrastructure Manager
