

TOP REASONS TO CHOOSE AXIGEN SERVICE PROVIDER MESSAGING

An excellent choice for both large and small Service Providers

A powerful solution, built on our unique mail server technology

Advanced messaging features and friendly licensing options

Supports a virtually unlimited number of mailboxes and domains

The investment that's well worth your money.

In times of tight IT budgets, everyone aims to maximize ROI and minimize TCO. That is why we bring you a cost-effective, turnkey messaging solution for Service Providers looking to host hundreds to millions of business-level email users, based on a powerful mail server for ISPs.

Gabriela Mechea,
Axigen CEO

Powerful, Yet Affordable

Achieve significant performance, scalability and cost benefits with a minimum initial investment

Save up to 50% on hardware

Count on Axigen's impressive processing speed & effective space management. See [our benchmarks](#) or [a case study](#) on how to [support 3 times more users with 40% less hardware](#).

Switch platforms (Linux / Windows) without any additional costs

Integrate Axigen with your current applications (e.g. billing, CMS, CRM)

Reduce operational / IT staff costs & ease the management burden

Stay worry-free thanks to our exceptionally reliable platform with effortless administration (via an intuitive web console or CLI) & maintenance. Additionally, you can serve multiple customers from a single Axigen instance & delegate administration to specific users / groups.

Count on us 24x7

Affordable, personalized technical support programs back you up around the clock (software maintenance is included).

Simple, Yet Highly Profitable

Build highly-attractive offers for your existing or potential customers and increase your revenue

Remain competitive against Hosted Exchange, Google Apps, Yahoo Mail

Rely on Axigen's secure messaging for SPs to keep your SaaS customers up & running:

- Host & operate the messaging platform on your premises (On-premise Service Provider Messaging) or
- Let us host & manage it for you (Hosted Service Provider Messaging).

Launch a variety of differentiated messaging services

Easily categorize your user base & offer them customized, value-added services at different prices (e.g. create Standard, Premium, Gold packs for customers).

Easily grow & expand your services

Thanks to Axigen's scalability & flexibility, you can quickly accommodate new subscribers & changing customer needs.

Boost your profits by increasing your customers' satisfaction

Gradually add new revenue-generating premium services to your offers, such as Outlook Connector, Calendaring, Collaboration, Wireless Mobile Sync, AntiVirus / AntiSpam.

Make money with Axigen's multiple advertising options

Push advertising messages to free email users or advertise your own premium services, via the WebMail interface.

Pay only for the premium users in your SP license

Treat your active and / or premium customers with feature-rich messaging services that perfectly fit their increasing communication needs.

Get lots of basic email users, for free

Keep communication costs to a minimum and reduce losses with inactive users by using these free basic services included in the SP license.

Easily migrate your basic users to premium

Allow your basic email users to try out premium services and smartly accommodate changing customer needs, messaging usage scenarios and contexts.

Licensing		
License duration	Perpetual / Yearly	
Mailboxes	Starting from 1,500 users	Up to 10 times the no. of premium users ³
Domains	Unlimited ⁴	

¹ Premium users refer to the number of paid mailboxes / users in the Axigen license.

² Basic users refer to the number of free mailboxes / users included in every purchased Axigen license.

³ For single-server SP licenses, free basic email users equal the number of premium users specified in the purchased license (e.g. by purchasing a single server SP license of 1,500 premium users, you will get 1,500 free, basic users). For multi-server SP licenses, basic email users amount to ten times the number of premium users in the purchased pack (e.g. buying a SP license of 50,000 premium users will get you 500,000 free, basic users).

⁴ The maximum number of domains cannot exceed the maximum number of premium users specified in the messaging solution license.

*Although the Axigen WebMail is not available for basic users, integration with third-party webmail solutions such as SquirrelMail, Roundcube or Horde IMP can be done fast and easily.
